

Job Posting: Industrial Power Tool Technician

Our Mission Statement: We create value for our customers by providing the highest quality products with the fastest, most reliable service in the industry.

The Opportunity: Are you looking for a new challenge in a fast-paced, dynamic work environment with an opportunity for career growth? Come join our growing team as an Industrial Power Tool Technician in Port Kells.

About the Company: Raider Hansen is a 100% BC owned and operated company, supplying industrial and safety products, tools and equipment to our customers throughout British Columbia. With nine branches from Vancouver Island to BC's Interior region, we are fully committed to serving our customers in every community we operate in. For over 60 years, we have proudly delivered premium industrial and construction brands, backed by the best service and support in the industry. We want you to grow with us!

Job Description: As an experienced and versatile tool technician, you are skilled at working on, but not limited to:

- industrial power tools
- hand tools
- pressure washers, compressors, and generators
- drain cleaners, threaders, inspection cameras, and press tools
- hoists and lifts

Job Responsibilities: Responsibilities and duties include but are not limited to:

- Identifying defects in products and determining necessary procedures for repair
- Repairing and/or replacing defective parts in products
- Testing products after repair and ensuring factory specs have been met
- Organizing and maintaining inventory and customer records in the Repair Department
- Communicating accurate information and guidance regarding products, costs, and repairs to customers, coworkers, and management
- Maintaining an organized work area including equipment, storage, and repair parts
- Completing tasks within given timeframes without compromising quality
- Other duties and tasks as assigned

Qualifications:

- Must have comprehensive knowledge of two and four-stroke gasoline engines
- Have a working knowledge of hydraulics and electric solenoid valves
- Demonstrate knowledge on single and three-phase electric motors
- Comfortable diagnosing electrical, mechanical, hydraulic components on own
- High school diploma or equivalent
- Five years' experience working with common hand and power tools
- Excellent communication and problem-solving skills
- The ability to work well independently and with a team
- Willingness to follow instructions well and learn new skills

What we offer:

- Extended health and dental benefits
- Full-time – Monday to Friday
- Comprehensive Training
- Opportunity for growth and advancement
- Fast paced and dynamic work environment
